

If you want to be **debt free, including your mortgage in 8 to 10 years**, read on (If not, pitch this letter.)

Liability Management is a financial service, much like tax management, asset management and risk management, which actively manages your debt.

Liability Management is not: Debt Consolidation or Debt Counseling – both of which can harm your credit rating. We take a professional approach to the liability side of your personal financial statement and use sophisticated techniques to reliably eliminate all creditor obligations – including mortgages – in about 8½ years without increasing payments. There is no out of pocket cost. We do not take short cuts or compromise your credit standing in any way. All your creditors will be paid in full and your credit rating will actually increase.

Our clients are commonly two income families with earnings between \$80,000 and \$180,000. They typically have mortgages, car payments, credit card bills and often other consumer debt. Our program has major endorsements from key organizations like the Teachers Union, Police Union, U.S. Treasury Workers, U.S. Postal Workers and others.

Liability Management was pioneered by Gulfstream Financial Corporation which has 10 years of experience and thousands of satisfied customers. Their proprietary package of payment allocation software, private banking services and debt restructuring specialists have allowed their customers to payoff millions of dollars in debt years ahead of schedule.

Early elimination of your mortgage will save you thousands of dollars in interest. More importantly it will free up funds that can be used to increase family wealth.

Do you want to be totally debt free in 8 to 10 years?

Do you want a meaningful retirement plan?

Do you want to convert thousands of dollars in interest costs to a viable wealth accumulation plan?
